YEARS FIELD CREW PIECES OF PLANT

40 years in the ground.

BSECC Pty Ltd (formerly Brett Sheldon Electrical) was founded in 1986 and has grown into a highly regarded civil electrical contractor specialising in in-ground electrical works.

We provide a highly skilled workforce of more than 50 electricians, plant operators, concreters, dogmen, general labourers and supervisors, supported by modern plant, equipment and strong technical capability.

BSECC has successfully delivered complex in-ground electrical and ITS packages for major Tier 1 projects across Australia.

North East Link. Three packages, three builders

MELBOURNE VIC • 2025 — CURRENT

BSECC has delivered in-ground electrical works across three separate North East Link packages. Each was won on the back of the last: performance on the first package led to the next being awarded, and then the next, with a different head contractor each time.
